

Solaradobe School Class registration

Register for Southwest Solar Adobe School: Education in adobe construction, adobe building, adobe home building, green building, rammed earth construction, and passive solar homes.

When you register, we will confirm by e-mail within 3 days or by written confirmation within a week. This is followed by a map to the class, local information and your first reading assignment. There will be several reading assignments sent to you before class. We may ask you a few questions by mail or e-mail about your location, climate and building plans. This helps us to best help you during class. Please read our [terms and conditions](#) before registering for classes.
